### **Working Waterfronts Preservation Master Plan Marina Siting Plan Year 2010 Comprehensive Plan Amendments and Land Development Regulations July 1, 2006-March 31, 2007**

Monroe County wishes to move ahead with the development of a Marina Siting Plan and implementation of strategies recommended in the recently developed Marine Management Strategic Plan. Staff recognizes that these two objectives will have some overlapping elements, such as data collected from the surveys that may be used towards the planning of strategies [and ultimately the development of Land Development Regulations (LDRs)] that will be site specific. Therefore, it will be necessary to conduct specific parts of the studies sequentially, while others will be done concurrently.

#### **Scope of Work:**

#### **Task 1 - Develop a Working Waterfronts Preservation Master Plan - 9 months (joint SFRPC/FAU)**

- 1) Conduct two public workshops to solicit public input from residents, marine industry business owners, and other stakeholders. The first of these meetings will be held at the beginning of the study to help establish the objectives of the project; the other will be held after preliminary findings become available, and will include on-site specific goals and recommendations that are developed in the Siting Plan in Task 2.
- 2) Conduct a workshop with officials from local municipalities at the beginning of the project to discuss the overall objectives of the project and to explore opportunities for coordinated actions among all jurisdictions in support of those objectives.
- 3) Use the Marine Port Advisory Committee as a technical advisory group for the project, with a maximum of 3 meetings to solicit input from this group.
- 4) Develop a survey (based on past surveys) to gather additional information on each marine facility identified in Appendix 3 of the Marine Management Strategic Plan. Surveys will collect the best available data on:
  - a) number of wet and dry slips, with a breakout by boat size;
  - b) usage rates of wet and dry slips;
  - c) on-site amenities including the number of parking spaces;
  - d) surrounding uses and any known or potential compatibility problems;
  - e) availability for public use;
  - f) number of boat ramps provided and the boat lanes for each ramp;
  - g) condition of facilities;
  - h) existing water quality trends;
  - i) availability of pump-out facilities; and
  - j) liveaboards

- 5) Conduct surveys at all marine facilities and compile the data acquired. Perform necessary analyses using the survey data to illustrate facilities distribution, boating service infrastructure, potential for marina expansion according to siting criteria, etc. (Note: Two budget options are provided, one based on the use of county staff and local residents to complete the surveys, the other using interviewers recruited out-of-county.)
- 6) Develop site-specific strategies based on general recommendations of the Marine Management Strategic Plan, using the data and conclusions generated from the Marina Siting Plan (see Task 2). The Master Plan has a broader focus and will include all working waterfront facilities, including boatyards, fish houses, etc., while the Marina Siting Plan will primarily cover marinas.

**Task 2 - Develop a Marina Siting Plan as required in Objective 212.4 of the 2010 Comprehensive Plan - 9 months (joint SFRPC/FAU)**

- 1) Coordinate with DCA in the development of the Marina Siting Plan to ensure the appropriate direction of the project and ultimately approval by DCA.
- 2) Complete the Marina Siting Plan, following the Monroe County Comprehensive Plan Policy 212.4.3 requirements. (FAU)
  - a) Develop and adopt marina siting criteria. In general, marinas will be located in areas where maximum physical advantages exist and where no unreasonable or excessive impacts are foreseen on marine resources. Marina construction will not involve destruction of any significant marine wetlands or seagrass beds.

Specific criteria for marina siting will reflect consideration of the following:\*

- i. benthic vegetation and faunal assemblages;
- ii. adequacy of circulation and tidal flushing;
- iii. access to deep water through existing channels of adequate depth;
- iv. minimal shoreline modification necessary;
- v. quality and size of upland areas and degree of alteration necessary;
- vi. ability to restore and enhance marina resource values at sites subject to past alteration;
- vii. location of propeller dredging problem areas; and
- viii. impact of boats on crocodiles, manatees\*\* and turtles.

\* See p. 14 of DCA's Best Management Practices Guide for comparison of siting criteria that could also be factors to consider, such as Proximity to Inlets and Popular (Boating) Destinations.

\*\* Monroe County does have documented watercraft-related manatee deaths, so FWC does maintain review authority over docking facilities.

- b) Prepare GIS maps of all existing recreational and commercial marinas surveyed.
- c) Identify sites on GIS maps with the potential for marina siting or expansion.

- d) Prepare GIS maps with siting suitability areas/zones indicated countywide, based on criteria and analysis. Such areas would be designated, e.g. Preferred, Conditional, Non-preferred, or Exclusionary, as a result of the site-suitability methodology and outcomes.
- e) Identify losses and turnovers of marine properties over the past 5 years to determine the impact of redevelopment, e.g. condo conversions or other non-water dependent uses.

**Task 3 - Develop Comprehensive Plan Amendments and Land Development Regulations - 6 months (FAU)**

- 1) Review/identify/compile existing Comprehensive Plan objectives, LDRs and other policies that address preservation of recreational and commercial working waterfronts, per Chapter 342.07, Florida Statutes.
- 2) Draft new Comprehensive Plan objectives and LDRs to implement the recommendations identified in the Working Waterfronts Preservation Master Plan.
- 3) Draft new Comprehensive Plan objectives, as necessary, to comply with the 2005 legislation (Chapter 342.07, Florida Statutes) regarding Comprehensive Plan elements, which address working waterfronts.
- 4) Draft an ordinance with proposed amendments to the Comprehensive Plan and LDRs.
- 5) Identify land use plan changes to prevent inappropriate development of the working waterfront.

**Payment Schedule**

**\$180,000**

Upon contract signature (July 1, 2006)	\$50,000
Upon completion and delivery of the facilities inventory (October 31, 2006)	\$80,000
Upon completion of all final deliverables (March 31, 2007)	\$50,000

I have been informed that it is not required for the county to go out for bid when entering into a contract with another state agency or municipality. Is this true and if so where can I obtain written documentation. I have searched the Florida Statutes website but I didn't find anything related.

Please help. Thanks.
